AIRPORT EMERGENCY SERVICE

FIRE SAFETY CIRCULAR

To Engineering/Commercial cluster colleagues and relevant kitchen operators

PROCEDURES DURING A PIPED GAS DISRUPTION IN CAG PREMISES

Arising from incidents involving the disruption of cooking gas supplies in kitchens using piped gas, a flow chart has been drawn up to identify the necessary work flow and minimize business disruptions. (Please see Annex A).

2 The flow chart in Annex A identifies the relevant parties to be contacted, actions to be taken by them during a gas supply disruption and the conditions whereby the gas supply may be restored.

3 For clarifications on these procedures, please contact the AES FSU at 65412535 or at fire.safety@changiairport.com.
