AIRPORT EMERGENCY SERVICE

FIRE PREVENTION CIRCULAR

To All Tenants in CAC,

DANGEROUS GOODS STORAGE AT WAREHOUSES

Recent enforcement checks revealed numerous operators storing dangerous goods in the warehouses without approval. Airport Emergency Service (AES) wish to reiterate that all storage of dangerous goods in warehouses have to comply in accordance to the fire safety requirements imposed by Fire Safety & Shelter Department (FSSD) of Singapore Civil Defence Force.

2. An improper storage may lead to numerous adversities leading to an outbreak of fire in extreme cases. Hence, we urge all warehouse operators who wish to store dangerous goods to obtain approval from FSSD and forward the approval to AES for sighting upon request.
3. Please note this fire safety compliance is a statutory requirement under the Fire Safety Act. For further clarification on the storage of dangerous goods, please contact AES Fire Prevention Section at 65412535 or via e-mail at fire.safety@changiairport.com.
4. Please disseminate the content of this circular to all staff concerned.
5. Thank you.
