AIRPORT EMERGENCY SERVICE

FIRE PREVENTION CIRCULAR

To All CAC, AMC, Ext Building Tenants and Building Maintenance Staff

AIRPORT EMERGENCY SERVICE LINKED TO SCDF VIA DECAM

AES watch room located at Fire Station 1 has been linked to SCDF via Decentralised Fire Alarm Monitoring Station (DECAMS).

With the new system, AES watch room will be required to provide information to DECAMS when there is fire alarm activation. Should the cause of the activation could not be ascertained as a false alarm within 2 minutes, SCDF will dispatch their resources to the activated location.

AES seek cooperation from building maintenance staff to assist in ascertaining the cause of fire alarm activation as quickly as practicably possible and update AES accordingly as soon as possible.

For further clarifications, you may contact AES Fire Prevention Section at 65412535 or email fire.safety@changiairport.com.
